Change Fund Worksheet

Count your starting cash **before** the first buyer arrives, and write the total down. At close, subtract this number from your cash — what's left over is what you actually made. A calm $60 fund handles almost every small sale.

Starting cash

Denomination	Suggested start	Count you actually have	Value
$1 bills	20	_____ × $1 =	$ _____
$5 bills	5	_____ × $5 =	$ _____
$10 bills	3	_____ × $10 =	$ _____
Quarters	40	_____ × .25 =	$ _____
Dimes	10	_____ × .10 =	$ _____
Nickels	10	_____ × .05 =	$ _____
STARTING CHANGE FUND TOTAL			**$** _____

Money rules for sale day

- ☐ One cash box, one trained helper — you count it, nobody hovers
- ☐ Start each sale with the fund; everything else is profit
- ☐ When a drawer of fives builds up, slide it inside — and note it here
- ☐ Never leave the cash box alone, even for one minute

Cash drawer log — if you take money inside

Time	Amount taken in	Who took it	Where it went (envelope? drawer?)
	$ _____		
	$ _____		
	$ _____		
	$ _____		

Closing the sale

Cash in the box at close	$ _____
Minus the starting change fund (from above)	− $ _____
TOTAL TAKEN IN	$ _____
Cross-check with the tally log: total should match	$ _____

If the box total and the tally log disagree by more than a few dollars, check for missed tally lines first — it's almost always a missed row, not missing money.
